Beware of cheap instruments on the internet!

- There are tons of instruments online that *seem* like inexpensive starters, but, in my professional opinion, **they aren't worth it.**
- These instruments **break easily** and **cannot be repaired** by instrument repair shops
- They are **very difficult to play**, especially when trying to match pitches and sound with a large band
- **Rule of thumb:** typically, if it comes with white gloves or comes in a bunch of different colors, do not waste your time or money!
